2. Area of operation.

3. Consumption pattern;

4. The type of market *i.e.* whether with high rise buildings/ number of commercial connection etc. It is, therefore, not feasible to lay down a uniform norm for the number of persons that should be engaged by an LPG distributor.

(d) As on 1|2|86, the distributor at Basti had 5058 consumers.

(e) Some complaints were received against the Basti distributor. The majority of them related to delayed supplies, some to over-charging and movement of cylinders into Nepal, etc.

As regards delayed supplies, due to overall inadequate bottling capacity, it has not been possible for the Oil Companies to meet the market demand in full. Consequently, the District Collector, Basti has intervened to regulate and supervise cylinder supplies to consumers from the distributor's showroom/godown.

All other complaints received were investigated but the allegations were not established.

Power Projects for Gujarat

1028. SHRI MUKHTIAR SINGH MALIK:
SHRI SHANKER SINH VAGHELA:
